

Country Focus: Netherlands

We assist our customers to achieve their objectives by understanding their business and changing needs.

Altus Holland is your gateway to Europe. Located in the Port of Rotterdam, and strategically located to Amsterdam's Schiphol airport and the Port of Antwerp, we offer customers the handling capability they need to and from European destinations.

Due to Rotterdam's extensive truck, rail, and barge connections, combined with the speed of customs handling, our national and international customers benefit from its preferred Port of Europe status.

In addition to its hub facilities, Altus offers storage and handling from 1 kg up to 1,000 Mt, bonded and non-bonded storage options, lashing services, and packing and re-packing.
